

P-100

1. Description	
	Dye Promotion Agent for Polyurethane Resin
	<p>P-100 is a dye promotion agent for polyurethane resin.</p> <p>It improves dyeing ability, stability and quality for synthetic PU resin.</p> <p>Since PU resin has urethane/urea composition, it cannot dye by itself; thus adding P-100 can solve the problem and makes standard dyeing soft and even.</p>
2. Properties	
Appearance	liquid
Main Component	Dimethyl formamide, Polymer suspension
3. Benefits	
1	P-100 assists in dyeing polyurethane resin.
2	P-100 enhances the standard dyeing quality to more softly and evenly.
3	P-100 improves dyeing and stability ability.
4. Handling & Storing	
1	Avoid contact with eyes, skin and clothing. Avoid breathing vapors or mist.
2	Store in a well-ventilated place.
3	In case of contact, immediately wash skin with plenty of water.
4	Keep away from heat and flames.
5	Darkens on prolonged storage, particularly at elevated temperatures.
5. Packing	
Steel open drum	180 kg
